mQoL-Peer: Assessing Individual’s Health State via Just-in-Context Individual’s Peers’ Evaluations

Platform Purpose

Study the value of social links (peers) and human-machine collaboration to support stress assessment.

- **Subjects** provide self stress assessment
- **Peers** provide independent assessment about the subject
- **Data logging** from sensors in smart-phone and other wearables. (Apps usage, screen touches, physical activity, user presence events, ambient light, connectivity, -in some cases- heart rate variability HRV)
